

Automated Bordereaux Validation

We make bordereaux validation easy!

The Problem: Validation Breaks When Rules Change

Things change – programs, contracts – all requiring the validation rules to change.

Static Rules

Rules are hard to change and not updated quickly. Often manual.

Constant Change

New programs, updated or new contracts not quickly reflected.

Errors Discovered Late

Carrier pushbacks. Errors found only after submission.

The result: delays, rework, strained carrier relationships.

5-Minute Bordereaux Validation

Current rules, automated correction, and human approval before anything is sent.

STEP-1

Upload BDX

Drag & drop your bordereaux file after selecting a carrier.

STEP-2

AI Validates

Rules are checked against your live contract data.

STEP-3

Review & Approve

AI flags errors with recommendations and 1-click fixes.

STEP-4

Clean Submission

Error-free BDX sent to the carrier only after human approval.

Easy Setup

< 30 minutes. One-time upload. Kavachio learns from your contracts.

1

Upload Contracts

Securely upload contracts and program documents to your private portal.

2

AI extracts rules

Kavachio reads every clause; validation rules and data requirements are extracted automatically.

3

Data model built

All fields are automatically mapped into the proprietary data model.

4

Edge cases flagged

Minor ambiguities or gaps are highlighted with clear recommendations.

5

You verify and approve

Nothing goes live without your sign-off — full control at every step.
